PROFILE

Software developer with a strong focus on backend development and extensive experience in SQL and noSQL databases. My dedication to software development, coupled with my analytical and problem-solving approach backed by logical and critical thinking, has been a key element in my contribution to multidisciplinary projects in the public and private sectors. My track record reflects not only adaptability to diverse environments, but also a constant commitment to excellence in software development.

EXPERIENCE

AWS Cloud Arquitect, **Grupo Salinas** **Oct 2023 – Present** **On Site**

- Designed, built and tested cloud-native applications using modern development methodology and best practices, deploying to Amazon Web Services (AWS) leveraging AutoScaling, Infrastructure as Code (IaC) and serverless or FaaS technologies.

Java Microservices Developer, **Grupo Salinas** **Oct 2022 – Oct 2023** **Hybrid**

- Developed and maintained microservices that were built with Java, increased performance by 10%, and reduced latency across microservices by 15% to improve user experience.
- Utilized Docker and GitLab to create and maintain container-based microservices, providing standardized and secure deployments.

iOS Mobile Frontend, **GoNet An Orion Innovation Company** **Jul 2022 – Oct 2022** **Remote**

- Designed user interfaces for iOS applications using Swift

Fullstack Developer, **Gobierno del Estado de Chiapas** **Oct 2020 – Oct 2022** **Hybrid**

- Developed web applications using Microsoft SQL Server, ASP.NET Web API and Vue.js
- Implemented agile software development methodology and used Scrum to maintain development progress.
- Developed intuitive and user-friendly interfaces that increased user engagement.

Fullstack Developer, **Global Transfer MX** **Jun 2020 – Oct 2020** **On Site**

- Developed web services with RESTful architecture, using Laravel PHP framework and Microsoft SQL Server for storage

Fullstack Developer, **Induxsoft Data Services** **Aug 2018 – Jan 2020** **On Site**

- Developed client-server applications with the help of various technologies including JQuery, HTML, CSS, JavaScript, and C#.
- Implemented and tested a number of solutions resolving complex data issues while ensuring the robustness and scalability of the code.

EDUCATION

Bachelor's Degree in Engineering in Technology and Software Development, **Universidad Autónoma de Chiapas** **Aug 2016 – Jun 2022**

Exchange Student, **Universidad de Boyacá, Colombia** **Jan 2020 – Jun 2020**
